

Wireframing The Code History Trivia Game

Abdullah Bilgin

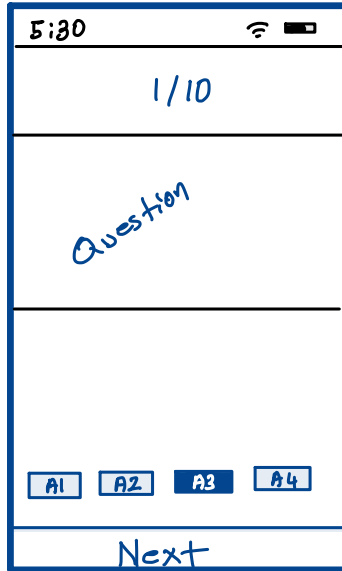

2022

Question Screen

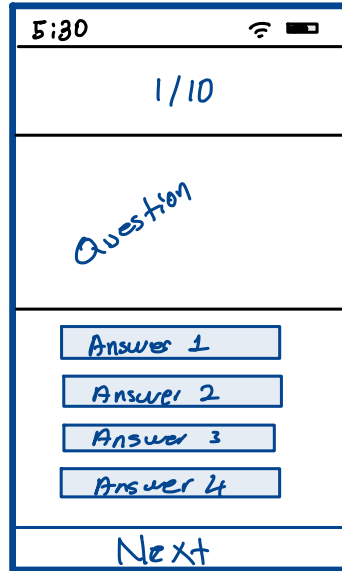

- Show Questions
- Show 4 options for the question
- Highlight the selected answer
- indicate if answer is correct
- show remaining questions
- Display a next button after a choice has been selected

⇒ This screen should:

- Present the question
- Present four options as answers to that question. Each of those options should be clickable.
- Indicate to the user if she/he has selected the correct or wrong answer to the question.
- Show how many questions are left to be answered.
- (Later) Display a button after a choice has been selected.

Second version

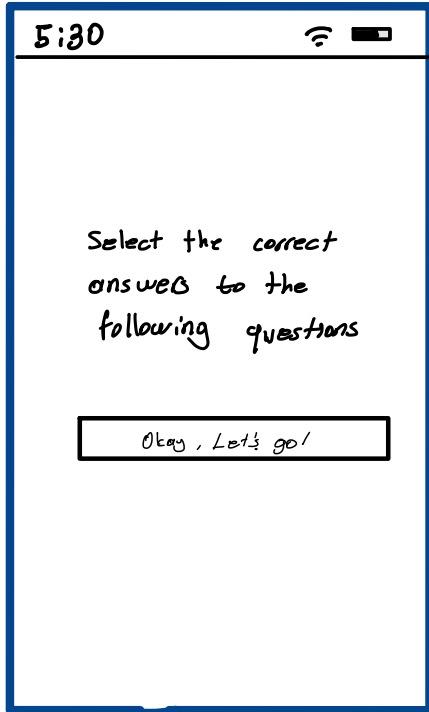

Welcome Screen

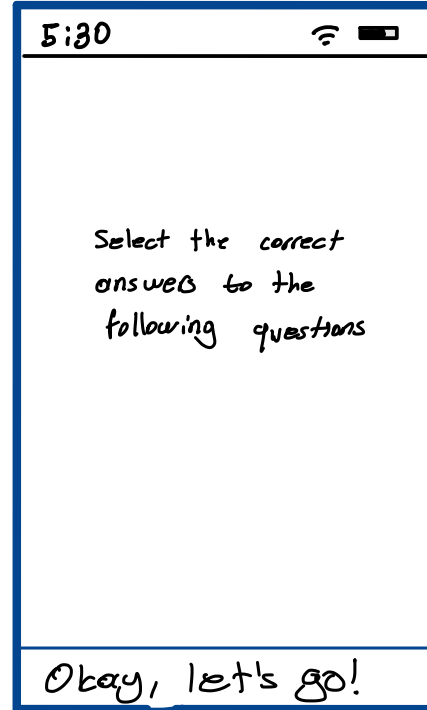

- Show starter message
- show button to start game

for this screen, I aim to welcome users and show them a message that prominently states the instructions of the game and button to start the game.

Start Game
Button

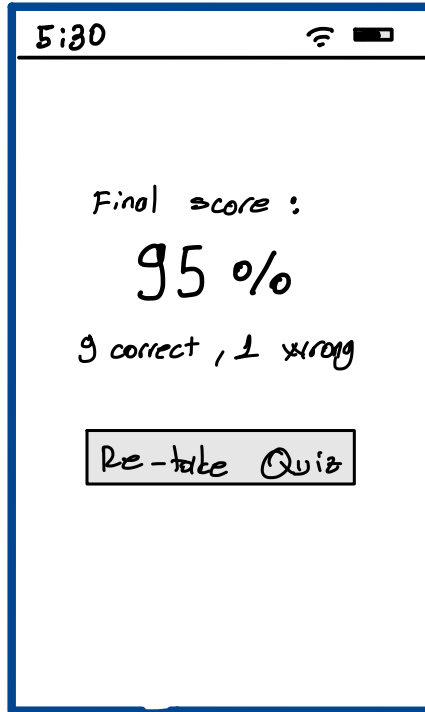

after user
feedbacks
